-----  
Are disaster management strategies effective in Southeast Asian countries?

Despite the escalating frequency and heightened severity of natural disasters in Southeast Asian countries, the effectiveness of their disaster management strategies remains an urgent concern.

What is a risk-based approach to disaster management in Southeast Asian countries?

Challenges in disaster management in Southeast Asian countries are addressed through a risk-based approach, which emphasizes planning and preparedness over event-based methods (Shaw et al., 2004; Becker et al., 2012; Oktari et al., 2021a).

Are critical infrastructures a problem in South Asia?

The status and extent of Critical Infrastructures in the South Asia Region are examined through expert critical analysis. Countries of SAR lack comprehensive infrastructure risk management, resulting in huge damage to CIs due to disasters.

Why is disaster mitigation education important in Southeast Asia?

To mitigate the loss of life and property during the disaster cycle in the Southeast Asian region, providing disaster mitigation education to the community is very important. At the very least, increasing public awareness regarding the vulnerability of their residential areas to disasters is very important.
