What is the Southeast Asia Solar supply chain map?

This edition of the Southeast Asia Solar Supply Chain Map provides a detailed snapshot of current realities and future ambitions, as the region navigates complex trade, investment, and production challenges.

Which countries will boost Southeast Asia into a major PV market?

The five major PV markets--Vietnam, Thailand, Malaysia, the Philippines, and Singapore--are set to boost Southeast Asia into a major PV market with strong policy push. Vietnam approved the long-discussed Direct Power Purchase Agreement (DPPA) on July 3, 2024, allowing electricity buyers to procure green energy via national or private grids.

Is PV module manufacturing in Southeast Asia under pressure?

Thanks to new data, this edition includes entries such as ICA Solar and United Renewable Energy (URE), reflecting the evolving landscape of PV manufacturing in the region. Despite strong ambitions, PV module manufacturing in Southeast Asia is currently under pressure.

Where is solar energy available in Southeast Asia?

Let's explore the solar energy landscape in some key countries within Southeast Asia: Thailand: Thailand has emerged as one of the leading solar energy markets in the region, driven by strong government support and favorable policies. The country offers feed-in tariffs and various incentives to promote solar power adoption.
