Why is Spain a key player in Europe's Lithium-ion battery industry?

Spain is emerging as a key player in Europe's lithium-ion battery industry, driven by the growing demand for electric vehicles (EVs), renewable energy storage, and industrial applications. With a focus on innovation, sustainability, and customization, Spanish manufacturers are contributing to the global energy transition.

What is Spain's energy storage program?

For stakeholders in battery storage, thermal storage, and pumped hydro, this program offers not only financial backing but also long-term stability and political support. Spain has launched a EUR700 million energy storage program to support battery, thermal, and pumped hydro projects, aiming to deploy 2.5-3.5 GW of capacity.

Why are battery storage options more suitable in Spain?

As a result, shorter duration storage options like batteries are more suitable in Spain. In Spain, over 50% of excess renewable energy occurs in periods where there is continuous excess for less than 12 hours i.e. a battery that chooses to charge on this energy would be able to discharge within 12 hours.

Will Spain's lithium-ion battery sector grow in 2025?

Recent News: In 2025, SAFT focused on low-carbon economy contributions, with 40 patents granted and EUR1.3 billion in sales. Spain's lithium-ion battery sector is poised for significant growth in 2025 and beyond, fueled by EU green initiatives, investments in gigafactories, and a push towards sustainable energy solutions.

With the rapid spread of renewable energy, lithium batteries are playing an increasingly important role in modern life and various ...

This article will mainly explore the top 10 battery manufacturers in Spain including NC Power, Millor Battery,
