What is a temperature and humidity controlled cabinet?

The temperature and humidity controlled cabinet range supplied by Blundell is designed to ensure that a constant temperature is maintained, and the relative humidity is kept between 1% - 5%. Dry storage cabinets are required for electronic, medical and engineering applications.

What size are server room cabinets?

Other paint colours are available along with a bespoke manufacturing service for rack cabinets of any size. Server room cabinets are typically nineteen inches (19inches) wide and referred to as 19inch server rack, 19inch server racks or 19inch racks.

How are humidity controlled storage cabinets and drying cabinets related?

Humidity controlled storage cabinet systems and drying cabinets are related to one another due to the rate at which the humidity level can be controlled. Desiccator cabinets, or desiccant dry boxes, are appliances which have a drying substance in them that acts to both remove water and protect the items from water in the ambient air.

What sizes are available for a bespoke electrical cabinet?

For a bespoke electrical cabinet solution, the Cadet(TM) Double-Skinned Cabinet is available with a single or double door in sizes up to 1000mm (w) x 1000mm (d) x 2000mm (h). It is also available in marine grade stainless steel with optional features including cable entries and inspection windows.

This award-winning cabinet offers the ideal room temperature storage (RTS) conditions for drugs, lotions, ointments and medicines, which are not kept refrigerated and labelled "store below 25°C".
