How to use a USB charger in Korea?

Just check that the charger says 100-240V, and you'll be good to go. For USB-powered devices, you can also use a universal USB wall adapter -- many hotels and caf&#233;s in Korea offer USB charging ports. If you're traveling with multiple electronics, a travel power strip with a universal input and a Korean plug is a smart investment.

Can I use a Type C charger in Korea?

Important note: Type C and Type F plugs are interchangeable in Korea. If your charger fits one, it will fit both. Most modern Korean wall sockets accommodate both plug types. However, older buildings may have recessed sockets where the thicker Type F plug fits more securely. What Is the Voltage and Frequency in Korea?

What type of plug does South Korea use?

South Korea uses the Type C and Type F plug types. Type C: Also known as the Europlug, it has two round prongs and is used throughout continental Europe. Type F: Also known as "Schuko," it has two round prongs like Type C but with grounding clips on the sides. These plugs fit into round recessed wall sockets.
