What is a portable charger?

A portable charger, also known as a power bank, is a compact battery pack that stores electrical energy to charge your devices on the go. These versatile backup batteries come in various sizes and capacities, from small lipstick-sized chargers perfect for emergency phone charging to large power stations capable of powering laptops and tablets.

What are the best portable chargers & power banks in 2025?

November 18, 2025: With this update, our lineup of recommended portable chargers and power banks remains unchanged. The existing picks have been vetted for currency and availability. The Anker Laptop Power Bank has a capacity of 25,000mAh, but more importantly, it can deliver 100W of power from a single port.

Does a 20W power bank count as fast charging?

Yes, a 20W power bank counts as fast charging--especially for smartphones. It's powerful enough to charge most iPhones and Android phones to around 50% in about 30 minutes (if your device supports fast charging).

How do I choose the right portable charger?

Selecting the right portable charger requires careful consideration of several key factors. Each element plays a crucial role in determining how well the power bank will meet your specific needs: Capacity: Measured in milliamp-hours (mAh), this indicates how much charge the power bank can hold. Higher capacity means more charges for your devices.
