What is a Type 4 telecom power outdoor cabinet?

The Type 4 telecom power outdoor cabinet is a new generation platform designed to meet customer needs, give configuration flexibility and supports a variety of applications. The cabinet is well suited for power, batteries and telecom equipment.

What are the advantages of a telecom cabinet?

The cabinet works very well as a stand-alone power and/or battery backup solution and provides additional space for telecom equipment. The fan and filter has the advantage that a large amount of air can be exchanged, giving very high cooling performance with low power consumption.

What is a power cabinet used for?

The cabinet is well suited for power, batteries and telecom equipment. within the outdoor plant depends upon a cool, dry and secure environment for the electronics such as the DC power and Telecom equipment.

How do I calculate the weights for other cabinet configurations?

The weights for other cabinet configurations can be calculated by adding or subtracting the weights given in the following table. The following diagram shows the front, top, and side views of an indoor primary cabinet and its dimensions. The following diagram shows the dimensions of the 3GP24i Power frame.

Specifications* The RCAB-OD-9367 is an outdoor cabinet system that provides maximum protection of customer's equipment against vandalism and extreme weather conditions. This ...

Only two carriers are currently supported. The following table provides approximate weights for batteries and other miscellaneous hardware. The ...
